

## YOUR HEALTH AND SAFETY ARE OUR PRIORITY!

All our centres across India are following stringent Covid-19 prevention protocols for your complete safety.

Mandatory checking of temperature for all who enter the premises

Patients fill self-declaration form to screen and identify high-risk patients

Incase identified as a high risk patient, he/she would be counselled to defer the fertility treatment

Patients are made to use sanitizer provided at the entrance

Patients have to cover themselves with adequate gear (hand gloves & masks)

Sitting arrangements done in a way to facilitate social distancing

Maximum two staff at a time at the reception counter

All working counters adhere to social distancing norms

Prior knowledge of on-going pandemic and recent travel/contact history is ascertained from the patient

Strict sanitization protocols including hand sanitizers at multiple points within the premises

Strictly defined protocols on staff education, counselling and training covering prescribed measures

Regular cleaning and disinfection of all the high touch areas

Periodic disinfection of all medical equipment

Regular monitoring by infection control team

All customer-facing staff use masks and other protective equipment

Mandatory for visitors and patients to follow exit norms - removal and disposal of gloves & masks, handwash and sanitization
